 **Italian** Native

 **English** B2 (actively working to reach C1 by September 2026)

About me

Curious and motivated Computer Science graduate interested in innovation and interdisciplinary collaboration. I enjoy working with others, exchanging perspectives and turning ideas into practical projects. My academic, professional and international experiences have strengthened my adaptability, communication and sense of responsibility. I aim to grow while actively contributing to the community around me.

Matteo Vittori

Education

UNICAM, ITALY

COMPUTER SCIENCE – School of SCIENCE and TECHNOLOGY

Graduated: **July 22, 2026**

Final grade: **110/110**

Relevant Coursework & Results:

- Probability and Statistics: 30 cum laude
- Algorithms and Data Structures: 30 cum laude
- Thesis: 30 cum laude

Experience

Seasonal Barista, Amandola, Italy

Summers 2022-2026

- Provided customer service in a fast-paced seasonal environment.
- Developed strong communication, reliability and problem-solving skills under pressure.

Research and Software Development intern

March 2026 – June 2026

- Collaborated within a research team on a video-analysis project developed during a 300-hour internship.
- Contributed to an experimental thesis awarded 30/30 cum laude.
- Worked on a use case for ENEA focused on monitoring structures and historical monuments.
- Strengthened teamwork, project organisation and communication skills.

Selected projects

SEF - Signal Extraction Framework

[More info](#) 

- Collaborative research project for video analysis and signal extraction, with applications in structural monitoring and historical heritage preservation.

UniStays – Student Housing Platform

[More info](#) 

- Developed full-stack platform for student housing, from idea to near-public release
- Implemented analytics dashboard, real-time chat, and listing management

Access Control Unit – Embedded Systems

[More info](#) 

- Built low-power access control system using Arduino Nano
- Implemented Morse code input and interrupt-based energy optimization

Skills

Technical Skills

Java, JavaScript, Python, SQL.

Soft Skills

Teamwork & collaboration,
Communication,
Team coordination,
Problem solving in dynamic environments,
Time management under pressure.
